

# Ultra-Narrow Bezel Video Walls- 55VH7B, 55VM5B & 49VM5C

## Impressive Engagement and Overwhelming Attraction

With their slim bezels and virtually borderless designs, the 55VH7B, 55VM5B and 49VM5C video walls offer maximum immersion. Their quad-core SoC system plays various types of content without the need for an external media player, with easy and efficient management tools. These video walls have been designed to raise engagement in areas such as museums, airports, galleries and large retail spaces.

### Key Features

#### Borderless Design

#### Ultra-Narrow Bezel

The borderless design with its 0.9 mm even panel bezel\* and 1.8 mm BtB (Bezel to Bezel)\*\* size, verified by Nemko\*\*\*, enables an immersive and virtually seamless viewing experience on assembled video walls.

#### \*Panel Bezel:

The black matrix section where an image is not displayed on the front panel.

#### \*\*BtB (Bezel to Bezel):

Panel Bezel + Panel Bezel (Borderless type, no metal bezel)

\*\*\*Nemko (Nogerois Elektriske Materiekkontroll) was established in 1933 as an institution for mandatory safety testing and national approval of electrical equipment to be marketed and sold in Norway. Since it was transformed into independent, self-owned foundation in 1991, it has provided worldwide testing and certification.

#### Smart Platform

#### Built-in SoC\* and Synced Playback

The optimized built-in quad-core SoC in the 55VH7B, 55VM5B and 49VM5C can play various content formats and eliminates the need for an external media player. Using its built-in SoC, each display plays its video tile without lag for synchronized content playback.

SoC

## Key Features

### Superior Picture Quality

#### Clear Viewing Angle

The 55VH7B, 55VM5B and 49VM5C ensure clear picture quality, even when installed in arrays of more than four, ideal for installations in large spaces.

\*The angle from the center of the screen to have 50 % of the initial luminance.

#### Uniform Brightness

LG's LED backlight technology provides high uniformity in brightness to ensure a clear picture. On other screens, certain spots may appear darker than others, but the new 55VH7B, 55VM5B and 49VM5C generate high visibility and a consistent brightness across the whole screen.

### Video Wall Image Creation Technology

Through Video Wall Image Creation (VIC) technology, color and brightness differences are compensated for by an algorithm within the circuitry that gives the panels the same characteristics, enabling the video wall to maintain a consistent white balance from panel-to-panel.

Conventional

55VH7B, 55VM5B, 49VM5C

### Image Gap Reduction

The 55VH7B, 55VM5B and 49VM5C include an image-improvement algorithm that can adjust to images moving within the boundaries of the bezels, enabling a seamless viewing experience from screen-to-screen.

### Enhanced Content Management

#### LAN Daisy Chain Performance

The LAN daisy chain allows you to execute commands to control and monitor the screens, and even update their firmware.

### Convenient Options

#### Guide Bracket / Classified Port

A guide bracket is an attachment that ensures the video wall remains flat. The classified in/out port prevents errors when connecting a daisy chain.

#### Control Buttons

With 8 control buttons, it's easy to operate various functions of the 55VH7B, 55VM5B and 49VM5C, such as controlling the OSD (On Screen Display) and changing the input source.
